Information for patients, carers and families

Who are we?

We are registered social workers employed by LOROS, based at the Hospice to provide support and advice to patients, families and carers.

Who can we help?

We are here to listen to you and to provide advice and emotional support to patients, families and their carers.

When someone becomes seriously ill, all those involved with the person can be affected. We understand that illness and grief can cause changes to all aspects of peoples' lives and adjusting to their current situation can be very difficult.

It may help to talk about the changes and feelings you are experiencing with someone outside your family or friends.

How we can help you and your family?

- By listening to you. If you are a patient, family member or carer you may find it helpful to talk to us

- We can advise or direct you to what help there may be available locally or nationally
- We may be able to liaise with other organisations on your behalf or provide you with information for example future care planning, signposting to seek financial or debt advice for those with money worries
- Help with claiming benefits
- Discuss your worries about someone caring for you or someone in the family or about a young carer (under 18)
- Listen to your experience of being a carer
- Guidance with finding local clubs or support to help alleviate social isolation
- Advice to claim for a Blue Badge disability parking permit (if you meet your Local Authority criteria)

How to contact us

Ring us on (0116) 231 8410/8443 or speak to a member of staff

Do you care for someone?

A carer is a person who provides care and/or support to someone such as a partner, relative, friend or neighbour who needs help to undertake daily tasks. This could be practical or personal support regardless of whether they are paid or not.

You do not have to care full time and you do not have to live with the person to be regarded as their carer.

Carers provide a very valuable service and the role of carer can be complicated, juggling many tasks.

You may have a job and still be a carer. You may also be a carer for more than one person for example, a child and an older person.

There are approximately six million carers (1 in 8 adults) in the UK with over one million carers caring for more than one person.

How we can help to support carers?

- By listening, giving support, advice or information
- Carers are eligible for a Carers Assessment from their Local Authority Adult Social Care Department to identify any support available
- Please tell your GP that you are a carer so they support you better, as evidence shows that carers can suffer poorer health and well being through their caring role due to carer stress
