

e-ELCA and Beyond

I'd like to draw your attention to useful sessions in the e-Learning for Health resources that aren't in the e-ELCA programme but scattered in the other 118 programmes! You can gain access to any of these by going to the 'my account' tab and clicking 'enrolment'.

The screenshot shows the 'My Account' page on the e-Learning for Health platform. The page is titled 'Welcome christina | Log Out' and has navigation links for 'Home', 'My e-Learning', 'My Account', and 'My Activity'. A search bar is visible at the top. A dropdown menu is open under 'My Account', showing options: 'Personal Details', 'Employment Details', 'Change Password', 'Additional Security', 'Enrolment', 'Reporting Permissions', and 'External Systems'. The main content area displays a list of programs grouped into categories: 'Acute Care', 'Secondary Care - Surgical', 'Secondary Care - Medical', and 'Secondary Care - Diagnostic Services'. Each program has a checkbox for enrollment. A message at the top of the program list states: 'Choose which Programmes that you wish to access by checking the relevant box and then select the Save button. We advise you not to choose too much content at first as some of these Programmes are extremely large and you may experience some issues around.' The 'Acute Care' section includes programs like 'Acute (NIV)', 'Acute Medicine (ACUMEN)', 'Anaesthesia (e-LA)', 'Emergency Medicine (EMD)', 'Foundation (FND)', 'Foundation 2012 (FND12)', 'Intensive Care Echo and Basic Lung Ultrasound (ICE-BLU)', and 'Transient Ischaemic Attacks (TIA)'. The 'Secondary Care - Surgical' section includes 'Applied physiology and imaging for CSAAPP course', 'Dentistry (e-Den)', 'Fetal Monitoring (eFM)', 'Laser Safety (eLaser)', 'Ophthalmology (Eye-Site)', 'Ophthalmopaedia', 'Oral and Maxillofacial Surgery (e-Face)', 'Plastic, Reconstructive and Aesthetic Surgery (e-LPRAS)', and 'Surgery (SUR)'. The 'Secondary Care - Medical' section includes 'Dementia (DEM)', 'Endoscopy eLearning Project (EPY)', 'Renal Medicine (Kidn-e)', 'Dermatology (e-Derm)', 'Medical Problems in Pregnancy (MPP)', and 'Sexual Health & HIV (HIV-STI)'. The 'Secondary Care - Diagnostic Services' section is partially visible.

A brand new Acute [NIV](#) programme has been launched. This has useful learning about the physiology of respiratory failure and assisted ventilation but also has lots of information about the use of NIV in COPD and includes some focus on end of life issues.

The [Dementia](#) programme has a useful session [on end of life care](#) written by Murna Downs and Lindsey Collins from the University of Bradford. The session addresses the Tier 2 learning outcomes for Dementia, as defined in the Dementia Core Skills Education and Training Framework. It may be a useful teaching resource for you.

There are 14 sessions about [DoLs](#) developed by the RCPsych. The most useful may be DoLS Legal Process [Overview](#). I'd be interested in feedback.

I've previously highlighted the value of [Tracheostomy safety](#), especially for SpRs to support their curriculum.

If anyone has used other sessions it would be good to share this knowledge so please send me your comments and I can facilitate this

Learning paths

 ELCA 00 - Introduction Last accessed: 15 Apr 2016

 ELCA Oxford Learning Paths	
 ELCA Yorkshire & Humber Learning Paths	
 ELCA ULHT Learning Paths Last accessed: 20 May 2016	

If you venture onto the Hub page for e-ELCA you will see the 8 module folders and further down folders of learning paths including that for Priorities for Care of the Dying person. Learning paths are collections of e-ELCA sessions brought together for a specific focus or staff group. Adam Brown at United Lincolnshire Hospitals Trust (UHLT) has developed a core training programme of e-ELCA sessions for doctors, palliative care link practitioners and other health care staff. This is hosted on the e-ELCA website and integrated with the Trust ESR so activity can be logged. You might want to use this for your hospital or develop one of your own for your hospice, hospital, community service. e-LfH is very open to supporting this so get in touch if we can help.
